Montessori Education Questions and Answers

Most educators and psychologists today argue that the single most important period in the development of a person’s intelligence occurs between the ages of 0 and 6. A child’s mind is strongest during this time and is at its peak during these early years. When properly nourished and stimulated, the child’s mind forms patterns for learning that serve him well throughout life. A child’s preschool education, if done properly, has been shown to be one of the most effective and efficient ways to guide a child through these critical years.

What is the difference between Day Care, Nursery Schools, and Preschools? Day Care Centers are generally for the purpose of caring for children on an all day basis. Nursery Schools are generally preschool education. Preschools are oriented toward educational experiences combined with socialization and play. In the classroom you’ll notice children interacting—continuously—choosing to work on projects together, and older children helping younger ones. Each day there is some group activity and play outside.

What about socialization and group work? Socialization is very much a part of the Montessori Method. In the classroom you’ll notice children interacting—continuously—choosing to work on projects together, and older children helping younger ones. Each day there is some group activity and play outside.

Who started the Montessori Method? Dr. Maria Montessori was Italy’s first woman medical doctor. Using her scientific background, the gifted observing child, the child’s natural curiosity was satisﬁed and he begins to experience the joy of discovering the world about him. Materials and experiences are selected with the aim of stimulating the child’s unique approach to learning. Rather than “teaching” the child concepts, an environment is designed to stimulate his interest and facilitate his understanding and learning capacities spontaneously, with many manipulative, self-correcting materials. The Montessori Method of education is basically a unique approach to learning. Rather than “teaching” the child concepts, an environment is designed to stimulate his interest and facilitate his understanding and learning capacities spontaneously, with many manipulative, self-correcting materials.

What is the purpose of the Montessori Method? Dr. Montessori thought of this system of learning as an ideal preparation for life. The main purpose of the Montessori Method is to develop an environment where the child can unfold spontaneously and mature the greater potentialities of his being. A child can do two things: he can proceed at his own pace from simple activities to more complex ones. Through this process, the child’s natural curiosity is satisﬁed and he begins to experience the joy of discovering the world about him. Materials and experiences are selected with the aim of stimulating the child’s unique approach to learning. Rather than “teaching” the child concepts, an environment is designed to stimulate his interest and facilitate his understanding and learning capacities spontaneously, with many manipulative, self-correcting materials. What is the Montessori preschool different from other preschools? In most preschools, the children are taught educational concepts in a group by a teacher. In a Montessori classroom you’ll notice children interacting—continuously—choosing to work on projects together, and older children helping younger ones. Each day there is some group activity and play outside.

How do children interact in the environment? As the child begins to move and the senses and the ability to use them expands continually.

What is the role of the Montessori Teacher? The Montessori teacher is called a Directress because she facilitates the child’s development in the environment. She is not the teacher in the traditional sense, she is the child’s guide. She does not dictate, but rather guides the child’s development.

How are Montessori schools accredited? The Montessori classroom is a child-sized world. Whatever in the world is inanimate can be mimicked in a three-dimensional manner. This is true of a child’s inner world.

How do children learn in Montessori education? There are certain materials and methods that have been successfully used in Montessori education. This unique method of education has been used successfully in all parts of the world and in all types of programs.

What is the Montessori preschool? The Montessori preschool is part of a sequential preparation. While there are certain materials and methods that have been successfully used in Montessori education, there is some group activity and play outside.
